EDUCATION

California Polytechnic State University,
BS in Computer Engineering & BA in Political Science
Honors: National Army ROTC Scholarship Recipient

San Luis Obispo, CA
Expected June 2028

PROFESSIONAL EXPERIENCE

Center for Teaching, Learning and Technology (CTLT)
MIDAS Team Lead

San Luis Obispo, CA
April 2025 – Present

- Optimize team workflows and project-manage deliverables to ensure consistent campus-wide ADA compliance across all digital materials.
- Lead team onboarding and training sessions, serving as the primary technical point of contact for accessibility platforms and internal software tools for a 21 person team.
- Direct initiative-driven leadership resulting in a promotion to Team Lead within two months of joining the organization.

New Student and Transition Programs
WOW Student in Charge

San Luis Obispo, CA
September 2024

- Led and coordinated student leader teams across multiple large-scale events, acting as a central point for escalation and logistical resolution.
- Provided detailed feedback and one-on-one coaching to student leaders to ensure the smooth operation of the Week of Welcome.
- Organized and ran events that were attended by 5,000+ incoming freshmen during orientation.

TECHNICAL PROJECTS

Mustang Ball Website
HTML, CSS, Javascript, React Framework

June 2025 – Present

- Developed a responsive React-based event website for Cal Poly's Mustang Ball with dedicated sections for event details, ticketing, contact outreach, and photo galleries.
- Implemented reusable UI components and organized CSS styling to improve maintainability across content-heavy event pages.
- Optimized page structure and navigation to reduce friction for users seeking event information and ticket links.

Personal Portfolio Website
HTML, CSS, Javascript, React Framework

June 2025 – Present

- Designed and developed a responsive React portfolio website to present projects, experience, and technical skills in a clean, accessible format.
- Created reusable card components and dedicated project views, improving maintainability as portfolio content expands.
- Deployed the website on Cal Poly Unix servers, applying Unix-based hosting, directory management, and deployment workflows.

SKILLS

Skills: Python, System Verilog, C, SQL, HTML, CSS, Javascript, React, Git/GitHub, VS Code, Unix/Linux, Office 365, Google Workspace
